

Low Stress Cattle Handling Workshop Project

Saskatchewan
2008-2010

Purpose

- To place quality and economical training into the hands of producers that they can easily add to their Farm Safety Plan in Saskatchewan
- To increase reach across the large province to provide services to our RMs

Description of the Project

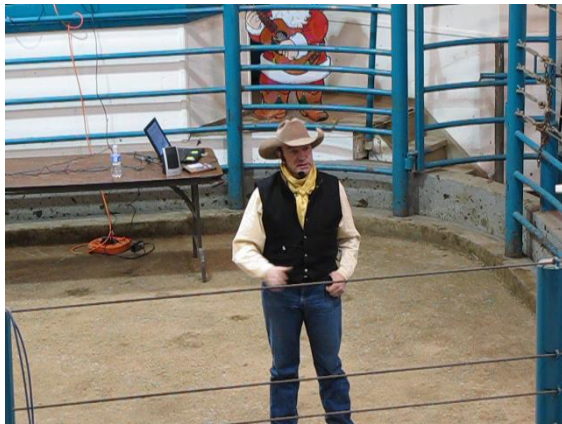

- Set up 5 workshops
- Identify local champion
- Call in the expert
- Promote workshops

Challenges

- Advertising
- Attendance
- Weather

What Worked

“Working within the community is crucial. Trust must be established between farmers and facilitators.”

Evaluation

- Evaluations indicated that the majority of participants intended to apply various LSCH techniques and train family and workers in the art of Low Stress Cattle Handling

Moving Forward

- Influence beyond our borders
- Other Workshops
