

SPOTLIGHT Manitoba

Producers in Manitoba indicate they are highly* motivated to improve safety on their operation. However, they still see barriers preventing the consistent implementation of safe practices and most Manitoba producers have not accessed safety information/training this year. Most producers have a safety plan in place; however, the majority of plans are unwritten and cover limited measures. Producers feel these plans, written or unwritten, are effective in preventing injury on their operation. Almost all producers believe the work on their operation is done safely most or all of the time, despite a quarter having had some type of incident on their operation within the last year.

STATE OF SAFETY
