FOR IMMEDIATE RELEASE

## **The Dangers of Grain Entrapment**

Did you know that grain entrapment can happen in seconds? And, unfortunately, many people who become trapped in grain do not survive.

Grain in motion can be extremely dangerous because it acts like quicksand and quickly pulls a victim down. Once trapped in grain, it's impossible to get out on your own.

So, what's the best way to keep safe around grain? Stay out of grain altogether. That includes grain trucks, grain bins, and grain piles.

Remember to always keep grain in good condition, keep children and other unauthorized people away from grain hazards, and have a plan to BeGrainSafe.

For more information about grain safety, visit [casa-acsa.ca/BeGrainSafe](http://casa-acsa.ca/BeGrainSafe).
