FOR IMMEDIATE RELEASE

Learn How to BeGrainSafe!

Have you been thinking about developing a grain emergency response plan for your farm? Or maybe you want to introduce your employees to grain handling and storage hazards? Or how about bringing a grain rescue training course to your local fire department? The BeGrainSafe program can help with all of that!

The BeGrainSafe program is the Canadian Agricultural Safety Association's grain safety program. Since 2017, the BeGrainSafe program has brought valuable grain safety information to Canadian farming communities in an effort to save lives.

Through training and building awareness about the hazards of moving grain, we can prevent grain entrapment fatalities.

For more information about grain safety, visit casa-acsa.ca/BeGrainSafe.
