FOR IMMEDIATE RELEASE

Be Aware of Grain Hazards

With the busy harvest season underway, it's important to take time to remember to BeGrainSafe.

It's no secret that grain is associated with numerous safety concerns, including respiratory, fire and explosion, and entrapment hazards.

In fact, grain entrapment can happen in just seconds. Bridged grain, flowing grain, and grain avalanches are all dangerous and can quickly bury a person causing serious injuries or worse, death.

Stay safe this harvest season by being aware of grain hazards. For more information about grain safety, visit casa-acsa.ca/BeGrainSafe.
