**Grain Bin Fall Protection: Northern Strands' Bin Safe System**

Our patent pending fall protection system is a cutting edge product designed to protect farm workers from a fall while climbing or accessing a bin for repairs or inspections.

Northern Strands has spent hundreds of hours testing this product. We have had to pull test the system on dozens of different types of grain bin configurations.

It is a one of a kind system allowing for safe bin climbing. It is easy to install, cost effective, and OH&S CSA & ANSI compliant. It reduces the stress of working at heights, farmers are responsible for the health and safety of the person climbing the bin, and accidents do happen.
