FOR IMMEDIATE RELEASE

Farm Machinery is Slower than it Appears

As spring planting continues, remember that farm machinery is slower than it appears. It is our job to slow down, focus on the road and look for hazards.

Remember that farm machinery moves a lot slower than regular traffic. A regular vehicle can overtake tractors and other farm equipment very easily. Slow down and look for hazards on rural roadways. It could save your life.

Let's drive defensively on the road this spring, and work together to make sure everyone makes it home safely.
