**FOR IMMEDIATE RELEASE**

## **Be Safety Proactive with Oversized Loads**

With the spring planting season underway, more oversized loads are on the roads moving between farmyards and fields. And larger farm equipment can mean larger transportation challenges.

Before hitting the road, make sure to carefully plan your route to know of any potential obstacles along the way. Consider whether your oversized load needs a pilot vehicle, especially for routes with high speeds and high traffic.

Keeping an eye on loads is difficult once you're on the road, so double-check that everything is secure before leaving.

We all have the same goal of getting home safely at the end of the day, and being safety conscious and proactive on the road will help make sure that happens.

For more information about farm safety, visit [www.casa-acsa.ca](http://www.casa-acsa.ca).
