FOR IMMEDIATE RELEASE

Does Your Farm Machinery Need a Pilot Vehicle?

Now that spring has arrived, more farm machinery is travelling between farmyards and fields.

Before hitting the road with your farm machinery, evaluate whether you need to use a pilot vehicle. When transporting oversized loads or travelling on high-speed roadways, use a pilot vehicle whenever possible.

Pilot vehicles can help prevent incidents by letting other motorists know to be cautious when approaching or passing.

Be sure to check traffic laws in your area for requirements about pilot vehicles.

We all have the same goal of getting home safely at the end of the day, and being safety conscious and proactive on the road will help make sure that happens.

For more information about farm safety, visit www.casa-acsa.ca.
